

## SUPPORTING SENIOR LEADERS IN BUILDING A STRONG “SAFETY FOR ALL” WORKPLACE CULTURE

Research shows that significant shifts in workplace safety culture comes when an organization’s senior leadership makes safety a top priority.

### **We want to help you achieve these results!**

AWARE-NS is offering SAFERi, a program designed to help build and sustain core health and safety competencies in order to foster a “safety for all” workplace environment.

This one day program sets Senior Executives up for success by equipping you with the skills to act boldly, but strategically.

Developed from the *2021 Safety Leadership Engagement Strategy* (by CEO’s, Administrators, and Executive Directors representing Long Term Care, Home Care and Disability Support Sectors); this program provides a practical self-assessment tool, targeted leadership resources, and proven SAFERi approaches to establish a roadmap that will help leaders champion healthy and safe workplaces.

### **Secure your spot amongst your leadership peers!**
